

Preemie Blanket Instructions

You will need 1.5 yards of a gender-neutral or gender-specific baby pattern fleece fabric with the same size of solid fleece in any color except black, white or gray. Cut the two fabrics into 42-inch squares and follow the diagram below. Be sure you only cut three sides of fringe one inch apart and four inches deep. Leave one side cut with a straight edge so the coverlet for the incubator allows easy access to the tubes, wires and lifesaving machines for the baby. If you are someone who sews you can stitch the blanket closed on the one side but if not, we will do that for you! Feel free to include a card or note wishing the mother and her baby well. Sign only with your first name and contact me again for shipping or drop off instructions. If you have more questions, please contact me at Karen@TinyStarFoundation.org.

Thank you for your kindness and generosity!

Stay well,

Karen
